

# Evolutionary Changes In Primates Lab Answer Key

**Evolutionary Changes In Primates Lab Answer Key** - evolution history must have evolved over 4 million years ago. This differs from the time we see increased brain capacity in Homo, as the genus must have evolved just over 2 million years ago. What we see here is that characteristics that make us strictly “human” were acquired at different times over our evolutionary history. Created Date: 2/10/2011 11:51:18 PM Change Evolutionary Changes In Primates Lab Answers age-related change (e.g., limited time remaining, physical and cognitive decline), older adults may adopt new cognitive strategies.
